DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-21 in the reply filed on 2/25/2005 is acknowledged.
2. Claims 22-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/25/2005.

Claim Objections

3. Claims 1-21 objected to because of the claimed uncertainties. The claimed "the grill **may** be configured in on the wheels" in claim 1 is not considered to be positive claimed. Therefore, any portable grill with fold out legs and wheels would meet the claims because the claimed configuration may or may not happen. Also, for claim 1, the description in last four lines is unclear. For claims 12, 13 it is not clear exactly what the latch arrangement configured so that a user may simultaneously actuate the latching mechanism and grasp the handle.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

Art Unit: 3749

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-4, 7-8, 11-15 and 18-19 are rejected under 35 USC 102(e) as being anticipated by DeMars (U. S. Pat. 6,606,987).

DeMars shows a portable grill 14 comprising a firebox 12, fold out legs 226, fold out wheels 254, 256, a handle 216, locking mechanism 220,222, 252 for wheels, a latching mechanism 204, 206, 208 for attaching firebox, second handle 116 connected to the firebox, same as claimed. The wheels 254,256 may be folded and stored under the grill 14 (at pivot point 252) of the first position. The legs 226 may be folded and stored under the grill (at the pivot point 246) of the second position. Claim 1, last paragraph, merely calls for a specific configuration "may be" obtained but not necessary. Therefore, the examiner would not give any patentable weight to this claimed uncertainty.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out

Art Unit: 3749

the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 5-6 and 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over DeMars (U. S. Pat. 6,606,987) in view of Williams et al. (U. S. Pat. 6,792,935).

The portable grill of DeMars as above includes all that is recited in claims 5-6 and 16-17 except for the foldable handle. Williams et al. shows a portable grill with foldable handle 26 same as the applicant's. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the portable grill of DeMars to include a foldable hand as taught by Williams et al. in order to conserve storage space.

9. Claims 9-10 and 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over DeMars (U. S. Pat. 6,606,987) in view of Rhodes (U. S. Pat. 3,297,016).

The portable grill of DeMars as above includes all that is recited in claims 9-10 and 20-21 except for the spring biased latch mechanism. Rhodes shows a spring bias latch mechanism 50 with locking notches same as the applicant's. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute locking mechanism of the folded out wheels of DeMars with spring bias latch mechanism of Rhodes in order to facilitate installation and uninstallation.
